

## YOUR SERVICE, OUR ENGINEERS SERVICE HUB

### GUARANTEED BEST SERVICE FOR YOU & YOUR CUSTOMERS

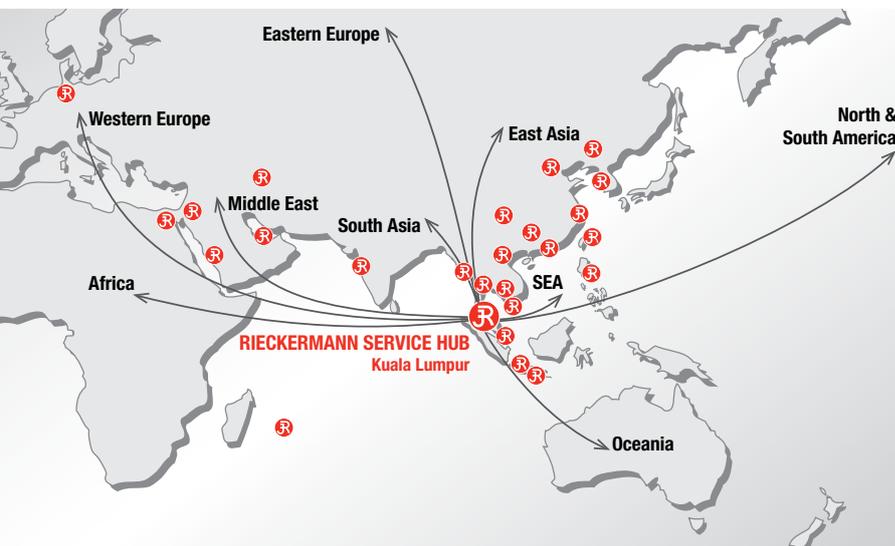

Acting globally requires a strong foothold in every market in order to maintain close proximity to your customers and satisfy their needs. Interacting with local staff in particular can pose functional and commercial challenges, such as language barriers, reaction times, or lack of operating licenses and unclear cost forecasts for annual budgets. To overcome those challenges when installing, servicing, and commissioning machines abroad, we offer Rieckermann Embedded Engineers.

Rieckermann Embedded Engineers substantially simplifies the setup of service teams by enabling you to have your own dedicated engineers in key regions, without an individual legal setup, hiring, or management processes. Furthermore, our solution enables you to budget the costs with one monthly lump sum for labor incl. overtime, overheads, management, and work tools. At the same time, you will benefit from the proximity of our engineers to your customers, cutting down reaction times, and preventing miscommunication because of cultural and language barriers.

### Rieckermann Embedded Engineers offers

- Special training on your processes
- Exclusive assignment to you
- Performance under your brand & label
- Highest flexibility & availability
- Full compliance with local labor & taxation laws
- Knowledge of local culture & language
- Direct sales support
- Availability of Rieckermann infrastructure & organizational support
